

but if B is \emptyset

if B = 1

but if B is \emptyset

if B is 1

Does it matter what order

$$= A + B + C$$

$$= C + A + B$$

etc...

associative and commutative law

for or

Associative and Commutative laws

Distributive Law

A	B	C	out	out
0	0	0	0	0
0	0	1	0	0
0	1	0	0	0
0	1	1	0	0
1	0	0	0	0
1	0	1	1	1
1	1	0	1	1
1	1	1	1	1

They are the same so
 $A \cdot (B + C) = AB + AC$

rule 10 proof

$$A + AB = A$$

$$\begin{array}{l}
 A(1 + B) \\
 \vee \text{ rule 2} \\
 | \\
 A(1) \\
 \text{rule 4} \\
 \leftarrow \\
 A
 \end{array}
 \quad \begin{array}{l}
 \uparrow \\
 = \\
 \leftarrow
 \end{array}$$

rule 12 proof

$$(A+B)(A+C) = A+BC$$

$$\begin{array}{l}
 AA + AC + AB + BC \\
 \vee \text{ rule 7} \\
 A
 \end{array}$$

$$(A + AC + AB) + BC$$

$$\begin{array}{l}
 A(1 + C + B) + BC \\
 \vee \text{ rule 2} \\
 | \\
 A(1) + BC
 \end{array}
 \quad \begin{array}{l}
 \uparrow \\
 = \\
 \leftarrow
 \end{array}$$

$$A(1) + BC$$

$$A + BC \leftarrow$$
